PROFESSIONAL EXPERIENCE

PixelQue Software Pvt. Ltd

13-Sep-2021 – Present

Job Title: **Associate Software Developer**

• **Full Stack Development:** This is a software based company so they have software work with. Such as great opportunity I found for work with their code base system and as an associate developer. They want every one as a full stack developer for frequently working with their task and bugs. There is a lot thing that enhance my knowledge as next level. Like working with mail functionality, export import system, understating of management huge Database collection etc.

• **Problem solving and bug fixing:** They have a huge code base for their product. And this thing help me learn a lot from it. For fixing their bug/problems I have to explore related file and functionality. I took this opportunity and crack a lot of hard work easily.

9i Digitals Service (Freelance Based).

Fed-2021 – Aug-2021

Job Title: Backend Developer

• **Backend Development:** Development and optimizing web-based application and app performance. I was collaborated with their front-end application developers, designing back-end components, and integrating data storage and protection solutions. I had developed and maintained all server-side network components.

• **DFD:** Document architecture, software data flow (DFD), and vulnerability threats. A data flow diagram (DFD) maps out the flow of information for any process or system. Creating DFD for better understand of flow of projects.
